

New eRapid system highlights

Home page

Notable differences:

- All the command icons and buttons have been moved to the 'Tools' menu. This is where you will find all additional functions, like the Customer Master, User preferences, pricing and competitor searches and so on.
- Navigation icons, such as 'Home' and 'Exit' have been replaced with buttons, located at the right of the menu bar.
- The search has been greatly enhanced to allow for multiple search criteria concurrently. It also shows results as you type, 20 at a time, at the bottom of the page, instead of on a new page that used to take a long time to open.
- Unit Pricing has been made into its own menu button instead of an option on the 'New Quote' selector.

Please note that the results page will show your most recent 20 quotes or orders if no selections have been entered in the search fields.

Once you start typing in the selection fields, the results will update dynamically with each key press. When the number of results exceeds 20, only the most recent 20 will be shown and the navigation buttons can be used to view the rest.

The buttons are as follows:

<< 1 - 15 of 15 >>
BPCS NO. PRICE

|< top, < page left, > page right, >| bottom.

Line Item List

Notable differences:

- The command buttons have been relocated at the top-right of the page, making navigation easier for quote with many line items. Some of the buttons were moved to a different page to improve navigation and flow.
- The single line item Tearsheet buttons have been eliminated as they were redundant and also to create space.

The screenshot displays the 'Line Item List' section of the eRapid Training system. At the top, a header box contains job details: Job No: 143947_00, Project: Test Training Project, Status: Closed Order, Entry Date: 2006-08-22, Rep No: 999, Architect: N/A, Type: C/S (Trade), and Bid Date: 2006-08-24. Below this is a table of line items:

Item #	Product	Qty	UM	Price	Description	Mark	Status
1	Tearsheet	LVR	1	EA	-	4080 Louver, Rectangular	L-1 P
2	Tearsheet	LVR	1	EA	-	4080 Louver, Rectangular	L-2 P
3	Tearsheet	LVR	1	EA	-	4080 Louver, Rectangular	L-3 P

Below the table are buttons: Quick Order, Quote Header, Global Update, Global Changes, and Tearsheets. The bottom section shows the 'Construction Specialties' logo and a navigation bar with buttons: Home, Exit, and Arthur Cosma. A sidebar on the left contains buttons: Header, Price Calc, Global Changes, and Global Update. The main content area shows quote details: Quote No: 017871_00, Project Name: eRapid Training, Status: OPEN, Bid Date: 2010-02-16, Type: Q, Architect: Gardner Plus Architects, Rep Number: 999, Entry Date: 2014-03-31. Below this is a table of line items:

Line No	Product Description	QTY	Price	Discount	Status
1	LVR 6100 Louver, Rectangular	2	1670.86	0	PASSED
2	LVR 6100 Louver, Rectangular	2	1440.29	0	PASSED
4	LVR 6100 Louver, Rectangular	1	675.72	0	PASSED
5	BV Brick Vent Model M32EX	10	534.93	0	PASSED

Please note that the 'Header' button can be used to open the quote / order header for editing.

Also, the 'Quick Quote/Quick Order' button has been renamed as 'Price Calc', as it opens the price calculator.

Global changes

Notable differences:

There is no need to update the screen any more – the new system updates the list automatically after performing the changes. At the same time, there will no longer be pop-ups, all processing happens on the main screen.

IMPORTANT: For the time being, until a resolution is found, the selection fields at the top must be DOUBLE-CLICKED.

The screenshot compares the 'OLD Global changes' and 'NEW Global changes' interfaces. The 'OLD' interface shows a table with columns: #, Std. col., Cham. col., Wood, H/R Std., H/R Cham., Powder, and a 'Change' button. The 'NEW' interface shows a similar table but with a 'Double-click for pull-down data:' label and arrows pointing to the selection fields. The 'NEW' interface also includes a 'Submit changes' button and a 'Select all' button. The 'OLD' interface has a 'Submit changes' button and a 'Select' button. The 'NEW' interface has a 'Submit changes' button and a 'Clear all' button. The 'NEW' interface also includes a 'Product ID' field and a 'Revision' field.
