

Configuration - Other EFS Models

Instructions for configuring other EFS models.

The screenshot displays the CS-Enterprise Configurator software interface. At the top, there is a menu bar with 'File' and a toolbar with various icons. Below the menu bar, the 'Configuring Product' section shows 'PEDISYSTEMS' with 'Order #: 002104_00', 'Line #: 5', and 'Quantity: 1'. A 'Request Date' of '04/15/2003' is also visible. The main configuration area is divided into several tabs: 'Configuration', 'Special Shapes/Misc. Options/Pricing', 'Web Links/Information', and 'Order Information'. The 'Configuration' tab is active, showing a tree view on the left with '1. MODEL' expanded, revealing 'GridLine' and '2. GRIDLINE SPECS'. The 'GridLine' block is selected, and its 'DIMENSIONS/LINE ITEM QUANTITIES' are shown on the right. These include 'Line Item Quantity' (set to 1), 'Width - Inches - Green' (set to 1/2"), 'Length - Inches - Red' (set to 1/2"), and 'Mark Number / Location'. Below these, '2A. OTHER GRIDLINE SPECS' are listed with checkboxes for 'Hidden Lock Down' and 'Surface Lock Down'. At the bottom, a status bar shows 'Unit Price:' and buttons for 'Update', 'Submit', 'Reset', and 'Cancel'. A red violation message is displayed at the bottom right: 'Violation: Please call factory for pricing non square/rectangular shapes. Violation: You must make a lock down selection. Violation: You must make a size selection.' The status bar also indicates 'CS-Enterprise Configurator ready.', 'Config', 'MODEL/G6', 'SERV', and 'ready'.

Violation: Please enter length and width and press UPDATE to have the system automatically select a standard mat size.

- Select “Duromat” and enter the Quantity, Width, Length and Mark Number. If the size entered isn’t one of our standard sizes the configurator will automatically select the next largest size.
- Click on the “Update” button at the bottom left hand side of the screen. Use this option to see what size carpet is to be priced.

- The configurator selects the best standard size. As noted in the example the best size is the 54 standard mat which is 60" by 48". See the gold block "2 Duromat Standard Sizes." This is the mat that will be priced.

- Select “Design Step Entrance Carpet.”

- Enter configuration information as required.
- Please note that adhesive must be ordered separately. It must be a completely separate line item. See the next page for additional adhesive instructions.

- Click on the “Gallon(s) of adhesive (coverage 135 sq. ft.).”
- Enter the quantity in gallons required in the “Line Item Quantity.”
- This quantity should be the total quantity required for every line item configured (entire job). Each line must be summed up manually. The quantity required for each line item is noted on the lower right hand side of each configuration.

End Section.
