# Speed Numbers

- A speed number is a pre-defined configuration that is saved and can be recalled. For example, the "Hilton Hotel" chain could order the same size Pedimat with a logo, and other typical details, which could be the same for each hotel they build. A speed number would be an easy way to pull up this same configuration every time.
- Click on the blue down arrow at the top of the screen, to the right of the "Speed No." block.
- Click on the drop down arrow to the right of the "Speed No." block.

- Click on a saved speed number to call it up.
- Please note:
  - Saved speed numbers are created by the Muncy Entrance Flooring Group only.
  - Representatives cannot create speed numbers.
  - They must be requested through the EFS group.
  - Saved speed numbers can be used by any representative.
